

# Expanded Market Coverage

With multiple brands in select locations, the Motion network of Jobspring and Workbridge amplifies market penetration by continually expanding and deepening local connections to the best tech talent and tech employers in each geography.

## Tech Job Seekers

Past and new tech candidates alike search jobs worked by the entire Motion network from one centralized job board to include all Contract, Direct Hire (Perm) and Contract-to-Hire tech roles. Candidates can always choose to work with either or both of the local Jobspring and Workbridge Agencies depending upon personal preference and matching jobs of interest.

## Tech Employers

### Large Hiring Volumes

Enterprise Tech Staffing Supplier Programs automatically default to using all of Motion's brands and resources. Tech candidate referrals are presented through Motion's streamlined account leadership program utilizing the client's desired engagement whether it be a direct contact model with hiring leaders or a no contact model leveraging a VMS platform only.

### Small to Medium Hiring Volumes

Individual hiring leaders recruiting for talent outside a formal Tech Staffing program with Contract, Direct Hire (Perm), or Contract-to-Hire tech positions can choose to work with the Motion Agency they have a more familiar and proven relationship with or a vendor neutral model leveraging a VMS platform.
